- 2 www.bloorresearch.com/analysis/project-management-still-neglected/

Project Management is a well-understood process but success still depends on the PM planning, communicating and executing effectively. Equally important, the project champion and users have to face up to the often-harsh truths when plans are tested in the real world. Organisations ignore this discipline at their peril.

Future Project Management Trends (2017+)

- Further Professionalisation, Sustainability and Ethical Development of the Industry/Workforce
- The Permanency of the Agile Project Management Method/Compressed Life Cycles
- Broadening Strategic Role of the Project Manager/Laser focus on strategy over projects
- Rethinking, Rebranding, Renewing the fundamentals of Change Management/Outsourcing
- Mastering Modern-Day Complexity with greater Technical Skills (IoT, DevOps, Big Data, NPD)
- Upskilling Talent Management with emphasis on soft skills plus a Gender Diverse Workforce
- The Need for Design Thinks for Innovative Solutions/Thought Leaders Needed with EQ
- Recognising the significance of Portfolio/Programme Management & Decentral PMOs
- Global Team, Co-location and Distributed Work with Secure Remote Tools/Mobile First
- Globalisation, International Alliances/Partnerships, Global Standards, New Technologies
- The spread of Project Management into non-PM arenas and become Entrepreneurs
- Smart leadership and the move away from operational hierarchies to leverage strengths
- Virtual Learning & Training Opportunities, Refresher Courses, New PM Entrant Platforms
- Increasing need for accountability, social responsibility and environmental management
